

UNLOCKING STRATEGIC U.S. URANIUM DEPOSITS

Wyoming, USA

- **Cold War-era production**, with several mines such as Arrowhead, which produced 500k lbs @ 0.15% (official records).
- **Large-scale uranium mine planned** by Union Pacific and California Edison across 6 pits. Production planned to start 1983.

COPPER MOUNTAIN URANIUM PROJECT

- **100%-owned**, district-scale, **18,000+ acre land package** in Wyoming, one of the the world's top uranium jurisdictions.
- Extensive historical work: US\$85m spent (current dollars) – **2,000 boreholes**, **7 deposits** (historic resources) and **20+ additional targets**.
- Historic Resource Estimates* totaling **26.6 Mlbs in 48.95 Mt @ 269 ppm eU₃O₈** (RMEC, 1977).
- *A qualified person has not done sufficient work to classify the historical estimates as current mineral resources or mineral reserves. Myriad is not treating the historical estimate as current mineral resources or mineral reserves.
- Historic Exploration Target**: **1,111 to 2,971 Mt** at 100 ppm eU₃O₈ or **222 to 594 Mt** at 500 ppm eU₃O₈ potentially containing between **245 Mlbs** (Control Area – 80% held) and **655 Mlbs** (Assessment Area – 62% held) (Bendix, 1982)
- **The potential quantity and grade is conceptual in nature. There has been insufficient exploration to define a mineral resource and it is uncertain if further exploration will result in the target being delineated as a mineral resources.

Myriad's Phase I Drill Program Confirmed and Surpassed Historical Results

- 2024 drill program **verified and exceeded historic gamma results**, finding **entirely new deeper mineralization**.
- Chemical assays confirm U₃O₈ grades **on average 60% higher** than eU₃O₈ grades from gamma probe (at cut-off over 1,000 ppm). **Some intervals previously below cut-off now exceed cut-off**.

New Geophysics Expands District Potential and Enhances Targeting

- Recent district-wide radiometric and magnetic survey has **confirmed numerous high-priority targets** supported by historical data. Many are in areas not previously drilled.
- **Surveys confirm significant potential to the east of known resources.**
- **140 radiometric anomaly points identified for follow-up investigation.**

Fully Funded Phase Two Drill Program Commenced July 2026

- **April 20, 2026:** NI 43-101 Technical Report filed for Copper Mtn; **historical resources of 26.6 Mlbs and exploration target potential (245 - 655 Mlbs)**
- **July 2, 2026:** Commencement of Phase II drilling at Copper Mountain.
- **August 20, 2026:** Preliminary Radiometric Results from Lucky Cliff Drilling.
- **Pursuing strategic objectives for the U.S. uranium supply chain.**

Magnetic Surveying

ARIZONA BRECCIA PIPES PROJECT

- **24 breccia pipes acquired** in 18 project locations
- **Total 6,080 acres**
- **Located in same district as Pinyon Plain** (Energy Fuels), America's highest-grade and most profitable uranium mine, which in Q2 2025 produced 638,700 lbs U_3O_8 at an average grade of 2.23% (Energy Fuels also reports copper mineralisation).
- **Wate Pipe - Historic Inferred resource*** of **1.1 Mlbs at 0.79% U_3O_8** (Energy Fuels NI 43-101, 2015).
- **34 ft @ 1.67% eU_3O_8** , from 1,489 to 1,523 ft depth in drillhole WT-5 (Energy Fuels NI 43-101, 2015).

*A qualified person has not done sufficient work to classify the historical estimates as current mineral resources or mineral reserves. Myriad is not treating the historical estimate as current mineral resources or mineral reserves.

Arizona, USA

RED BASIN PROJECT, NEW MEXICO

May 19, 2026: Sold for US\$2.5M to Subatomic - New Venture Backed Technologists Overmatch and 8VC (Thiel and Lonsdale)

- **Retained Interest = 10% free carried interest** and 10% of any liquidity economics
- **Strategic alliance to be formed on project pipeline**

Upcoming Milestones

- **August 21, 2026: Acquired 100% of Copper Mtn** from Rush Rare Metals by way of **completed** merger.
- Advance Copper Mtn project via drilling, geophysics, expansion.
 - Key targets: Midnight, Lucky Cliff, Cedar Ridge
- Move to NASDAQ or NYSE, preparation in process.

Capital Structure

*As at September 30, 2026

Shares Issued & Outstanding	141,053,948
Warrants (@ \$0.25 - \$0.55)	33,890,929
Stock Options (@ \$0.20 - \$0.50)	10,207,447
RSUs (@ \$0.40 and \$0.50)	5,340,000
Fully-Diluted	190,492,324

QUALIFIED PERSON

The technical information has been reviewed and approved by George van der Walt, Principal Consultant for The MSA Group (Pty) Ltd, a "Qualified Person" as defined in NI 43-101 who is not independent of the Company. The resource estimates and targets for the Copper Mountain and Red Basin are considered historical. A QP has not done sufficient work to classify these as current resources, and the Company is not treating them as such. Further details about the historic estimates can be found in the NI 43-101 Technical Report titled "Copper Mountain Uranium Project, Fremont County, Wyoming, USA - 17 April 2026".
